

# AmTrustCyber Services

## Did you know that strengthening your security posture can boost your business by increasing customer trust?

Increase the resilience and growth potential of your business by taking advantage of the following complimentary offerings available to AmTrustCyber policyholders.

### Assessment & Consultation

#### **Security Assessment and External Vulnerability Scan**

Take advantage of a consultation session with a technical cybersecurity analyst from one of AmTrustCyber's trusted service partners. This session is designed to assess your organization's environment, IT infrastructure, and security practices. Actionable recommendations will be delivered to help your organization address security challenges and goals.

#### **Incident Response Readiness Assessment**

Is your team prepared to handle a suspected security incident? A complimentary session with a DFIR (digital forensic and incident response) expert will highlight opportunities and action steps to improve your organizational preparedness.

#### **Virtual Tabletop Exercise**

Preparation is the key to performance. This 2-hour session includes professional guidance and facilitation to prepare and assess your team's ability to respond to a potential security event. Help your team understand their roles in a critical situation and uncover opportunities for improvement in a team-building environment.

#### **Google Workspace or Office 365 Security Review**

Leverage our expert partners to assess the administrative security controls in your Google Workspace or Microsoft Office 365 environment. Find balance between security and operational efficiency while protecting your organization from identity or business email compromise.

#### **Data Privacy Review**

Data is among the most valuable assets in the world. Take advantage of a complimentary consultation to assess your organization's data privacy practices and regulatory requirement gaps.

#### **SaaS Security Posture Management**

Do you have full visibility into the SaaS (software-as-a-service, i.e., applications, browser extensions, programs, etc.) that your employees are using and connecting to your environment? Are you up to date on the use of artificial intelligence (AI) in your supply chain? A complimentary assessment and review with Wing Security will provide a risk assessment for your environment, pulling back the curtain on "shadow IT" and equipping your organization with the tools and expertise to reduce software-related risk.

Click [here](#) for your free risk assessment from Wing Security or go to the following URL <https://wing.security/amtrust-wingsecurity/>

### Education/Training

#### **Security Awareness Training**

Your first defense against a breach is a well-educated team! Equip your organization with the necessary knowledge with complimentary security awareness training designed to help your employees identify and avoid social engineering and phishing attacks.

### Tools

#### **Managed Detection and Response (10 free licenses)**

An easy-to-install security solution with no additional expense, headcount, or administration on your part; all managed by a team of security experts. MDR combines automated technology with human expertise to rapidly identify and limit risk. This security tool, professionally managed by a team of dedicated security experts, can help insureds protect their computers, their network, and their business. And it is easily accessible at no cost for your first 10 licenses - because better protection for business doesn't have to be complicated or expensive.

### **Questions?**
