

Breach Response Vendor List

Network Security & Privacy Liability Breach Response Service

AmTrust's Network Security & Privacy Liability policy is written on a non-duty to defend basis which puts the insured in the driver's seat in the event of a claim. However, when a data breach occurs, it can be a daunting task to coordinate the many aspects of a breach response. It is considered an industry best practice for any affected financial institution to engage a Breach Coach as soon as possible to best "quarterback" the breach from start to finish.
